

Solving Mysteries

Open with prayer for God's wisdom to be given to us.

French entomologist August Magnan, in the 1930s, famously declares that the fact that a bumble bee can fly defies the laws of physics. Conventional, scientific wisdom now disagrees with Magnan's statement. The bumble bee flaps its wings back and forth instead of up and down, giving the little wings proper motion to support a rather large bee. We are always solving mysteries of God's creative work around us, and so is the same with many mysteries we face about God Himself. By God's grace, we are meant to pursue and receive more and more answers about God as we participate in the life He offers us. These answers do much more than keep a bumble bee in flight; these answers change lives. These answers make lives eternal.

Read Colossians 1 : 24 - 29

Questions to Answer and Apply: What is the mystery of which Paul speaks here in Colossians? Why was it "hidden" for so many generations? What is Christ's role in this mystery of God? What can we do in response?

Close in prayer with thanksgiving to God.
